Forensic Science International, 56 (1992) 213–215
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX
Volume 56 (1992)

acetaldehyde, disulfiram, disulfiram-alcohol reaction, alcohol reaction, pathology, toxicology, 45
after meal, alcohol, large dose, consumption, short time span, fasting, 113
airtightness, postmortem changes, time elasped after death, ammonium magnesium phosphate, severed head, 19
alcohol, large dose, consumption, short time span, fasting, after meal, 113
alcohol reaction, disulfiram, disulfiram-alcohol reaction, acetaldehyde, pathology, toxicology, 45
ammonium magnesium phosphate, postmortem changes, time elasped after death, airtightness, severed head, 19
amniotic fluid, cocaine, high flow columns, HPLC, 177
autopsy, trazodone, drug redistribution, 201

battered baby syndrome, retinal hemorrhages, child abuse, shaken baby, ocular examination, child injury, 77
bioanalysis, poisoning, cantharidin, ingestion, gas chromatography, mass spectrometry, 37
blunt, injuries, wounds, non-penetrating, dog, 51
bone, DNA typing, paternity, microsatellite, Mengele, 65
bone marrow embolism, cardiac massage, 195
brain death, meninges, dura mater, histology, 189
bupropion, metabolism, fatal intoxication, gas chromatography/mass spectrometry, 151

C. collinus, plant poisoning, lignan glycoside, ELISA, horseradish peroxidase, 127
cantharidin, poisoning, ingestion, bioanalysis, gas chromatography, mass spectrometry, 37
cardiac massage, bone marrow embolism, 195
child abuse, retinal hemorrhages, shaken baby, ocular examination, child injury, battered baby syndrome, 77
child injury, retinal hemorrhages, child abuse, shaken baby, ocular examination, battered baby syndrome, 77
close range, firing distance, gunshot residue (GSR), GSR transfer mechanism, GSRI, GSRII, long range, 1
cocaine, amniotic fluid, high flow columns, HPLC, 177
consumption, alcohol, large dose, short time span, fasting, after meal, 113
criminalistics, glass, windows, fragmentation, 95

defence wounds, shooting fatalities, suicide, homicide, 59
disulfiram, disulfiram-alcohol reaction, alcohol reaction, acetaldehyde, pathology, toxicology, 45
disulfiram-alcohol reaction, disulfiram, alcohol reaction, acetaldehyde, pathology, toxicology, 45
DNA typing, paternity, bone, microsatellite, Mengele, 65
dog, injuries, wounds, blunt, non-penetrating, 51
drug redistribution, trazodone, autopsy, 201
dura mater, brain death, meninges, histology, 189

ELISA, plant poisoning, *C. collinus*, lignan glycoside, horseradish peroxidase, 127
ephedrine, methamphetamine, impurities, gas chromatography, methamphetamine dimer, 157

facial measurements, facial recognition, 23
facial recognition, facial measurements, 23
fall-from-height, human body, hole, holeproof window, scene of death, scene investigation, 183
fasting, alcohol, large dose, consumption, short time span, after meal, 113
fatal intoxication, bupropion, metabolism, gas chromatography/mass spectrometry, 151
firing distance, gunshot residue (GSR), GSR transfer mechanism, GSRI, GSRII, close range, long range, 1
forensic pathology, self-infliction, stab wounds, 89

fractures, hanging, suicide, petechiae, larynx, 167
fragmentation, criminalistics, glass, windows, 95

gas chromatography, methamphetamine, impurities, ephedrine, methamphetamine dimer, 157
gas chromatography, poisoning, cantharidin, ingestion, bioanalysis, mass spectrometry, 37
gas chromatography/mass spectrometry, bupropion, metabolism, fatal intoxication, 151
glass, criminalistics, windows, fragmentation, 95
GSR transfer mechanism, firing distance, gunshot residue (GSR), GSRI, GSRII, close range, long range, 1
GSRI, firing distance, gunshot residue (GSR), GSR transfer mechanism, GSRII, close range, long range, 1
GSRII, firing distance, gunshot residue (GSR), GSR transfer mechanism, GSRI, close range, long range, 1
gunshot residue (GSR), firing distance, GSR transfer mechanism, GSRI, GSRII, close range, long range, 1

hanging, suicide, petechiae, larynx, fractures, 167
high flow columns, cocaine, amniotic fluid, HPLC, 177
histology, brain death, meninges, dura mater, 189
hole, fall-from-height, human body, holeproof window, scene of death, scene investigation, 183
holeproof window, fall-from-height, human body, hole, scene of death, scene investigation, 183
homicide, shooting fatalities, suicide, defence wounds, 59
horseradish peroxidase, plant poisoning, *C. collinus*, lignan glycoside, ELISA, 127
HPLC, cocaine, amniotic fluid, high flow columns, 177
human body, fall-from-height, hole, holeproof window, scene of death, scene investigation, 183

impurities, methamphetamine, ephedrine, gas chromatography, methamphetamine dimer, 157
ingestion, poisoning, cantharidin, bioanalysis, gas chromatography, mass spectrometry, 37
injuries, wounds, blunt, non-penetrating, dog, 51

large dose, alcohol, consumption, short time span, fasting, after meal, 113
larynx, hanging, suicide, petechiae, fractures, 167
lignan glycoside, plant poisoning, *C. collinus*, ELISA, horseradish peroxidase, 127
long range, firing distance, gunshot residue (GSR), GSR transfer mechanism, GSRI, GSRII, close range, 1

mass spectrometry, poisoning, cantharidin, ingestion, bioanalysis, gas chromatography, 37
mathematical equations, vitreous potassium, time of death, postmortem interval, 137
Mengele, DNA typing, paternity, bone, microsatellite, 65
meninges, brain death, dura mater, histology, 189
metabolism, bupropion, fatal intoxication, gas chromatography/mass spectrometry, 151
methamphetamine, impurities, ephedrine, gas chromatography, methamphetamine dimer, 157
methamphetamine dimer, methamphetamine, impurities, ephedrine, gas chromatography, 157
microsatellite, DNA typing, paternity, bone, Mengele, 65
multivariate, tibia, sex allocation, 29
myotonometry, rigor mortis, time of death, 147

non-penetrating, injuries, wounds, blunt, dog, 51

ocular examination, retinal hemorrhages, child abuse, shaken baby, child injury, battered baby syndrome, 77

paternity, DNA typing, bone, microsatellite, Mengele, 65
pathology, disulfiram, disulfiram-alcohol reaction, alcohol reaction, acetaldehyde, toxicology, 45
petechiae, hanging, suicide, larynx, fractures, 167
plant poisoning, *C. collinus*, lignan glycoside, ELISA, horseradish peroxidase, 127

poisoning, cantharidin, ingestion, bioanalysis, gas chromatography, mass spectrometry, 37
postmortem changes, time elasped after death, airtightness, ammonium magnesium phosphate, severed head, 19
postmortem interval, vitreous potassium, time of death, mathematical equations, 137

retinal hemorrhages, child abuse, shaken baby, ocular examination, child injury, battered baby syndrome, 77
rigor mortis, myotonometry, time of death, 147

scene investigation, fall-from-height, human body, hole, holeproof window, scene of death, 183
scene of death, fall-from-height, human body, hole, holeproof window, scene investigation, 183
self-infliction, stab wounds, forensic pathology, 89
severed head, postmortem changes, time elasped after death, airtightness, ammonium magnesium phosphate, 19
sex allocation, tibia, multivariate, 29
shaken baby, retinal hemorrhages, child abuse, ocular examination, child injury, battered baby syndrome, 77
shooting fatalities, suicide, homicide, defence wounds, 59
short time span, alcohol, large dose, consumption, fasting, after meal, 113
stab wounds, self-infliction, forensic pathology, 89
sudden unexpected death, taxine, yew, Taxus, *Taxus baccata*, Taxol, 81
suicide, hanging, petechiae, larynx, fractures, 167
suicide, shooting fatalities, homicide, defence wounds, 59

taxine, yew, Taxus, *Taxus baccata*, sudden unexpected death, Taxol, 81
Taxol, taxine, yew, Taxus, *Taxus baccata*, sudden unexpected death, 81
Taxus, taxine, yew, *Taxus baccata*, sudden unexpected death, Taxol, 81
Taxus baccata, taxine, yew, Taxus, sudden unexpected death, Taxol, 81
tibia, sex allocation, multivariate, 29
time elasped after death, postmortem changes, airtightness, ammonium magnesium phosphate, severed head, 19
time of death, rigor mortis, myotonometry, 147
time of death, vitreous potassium, mathematical equations, postmortem interval, 137
toxicology, disulfiram, disulfiram-alcohol reaction, alcohol reaction, acetaldehyde, pathology, 45
trazodone, drug redistribution, autopsy, 201

vitreous potassium, time of death, mathematical equations, postmortem interval, 137

windows, criminalistics, glass, fragmentation, 95
wounds, injuries, blunt, non-penetrating, dog, 51

yew, taxine, Taxus, *Taxus baccata*, sudden unexpected death, Taxol, 81
